WRENFORD BOROUGH COUNCIL

Statement Guide: Location

Document Guide 02 | Issue 3 | Owner: Street Care Office | Review cycle: every twelve months

1. What this guide covers

This guide covers location: where the defect is - the house it is outside or opposite, the lamp column it is next to, the junction it is at, the side of the street, or a rough place where the reporter could not fix it. It appears in every kind of document, most of all in call notes, where the contact centre asks the caller where the defect is.

The guide is used by the Street Care Coordinator or Highways Inspector who opens a review - the reviewer in this guide - and by the Highways Inspector who decides it. Whether a requirement is met is a separate question, settled by the report and its defect type's own standard. This guide is about what the documents show: the tools flag only a measurement sentence whose figure differs from the report's or gives a figure the report left blank, as the Report Rules set out, and every other check here is the reviewer's own.

2. How it shows up in a statement

A sentence of this kind usually says one of these:

- a house number the defect is outside, opposite or between
- a lamp column number read from the column's plate
- a junction with another street, or a corner or a bend
- a rough place - by the bus stop, near the shops - where the location is not fixed
- where the tree or hedge grows, on the verge or in a private garden

3. What the reviewer checks

These are the checks the reviewer makes, in this order:

1 Find the report's location description and whether its location is fixed.

2 Read each sentence of this kind for the house number, the column number or the junction.

3 Check that a sentence puts the defect where the report does.

4 Note a sentence that gives a column number the report did not, or a garden the report did not.

5 Note a rough place that the inspection will need to fix.

4. Requirements it bears on

Location bears on the location fixed requirement of every defect standard, on the column number requirement of the street lighting standard and on the highway land requirement of the vegetation standard.

5. When the statement and the report disagree

When a statement puts the defect somewhere else than the report does - another house number, another column, a private garden - the reviewer notes it for the Highways Inspector and keeps the report's answers, which still decide the requirements.

6. What to ask the reporter for

Ask the reporter for the house number the defect is outside, the lamp column number from the plate, or the junction it is at.

7. Telling it apart

Saying where the defect is, is a location, even when the place is a school gate or a bus stop; saying who could be hurt there, and how, is a hazard, which the Hazard guide covers. "It is by the bus stop" is a location; "people getting off the bus could trip on it" is a hazard.
