WRENFORD BOROUGH COUNCIL

Statement Guide: Photograph

Document Guide 03 | Issue 2 | Owner: Street Care Office | Review cycle: every twelve months

1. What this guide covers

This guide covers photograph: what a photograph attached to the report shows - the defect itself, a ruler, a tape, a coin or a shoe beside it for scale, the kerb or the gully near it, and where it was taken from. It fills the photo notes and appears in resident descriptions sent with a photograph.

The guide is used by the Street Care Coordinator or Highways Inspector who opens a review - the reviewer in this guide - and by the Highways Inspector who decides it. Whether a requirement is met is a separate question, settled by the report and its defect type's own standard. This guide is about what the documents show: the tools flag only a measurement sentence whose figure differs from the report's or gives a figure the report left blank, as the Report Rules set out, and every other check here is the reviewer's own.

2. How it shows up in a statement

A sentence of this kind usually says one of these:

- the defect shown close up or from a distance
- something beside it for scale
- the water over the gully, or the branches over the path
- where the photograph was taken from
- a photograph that is dark or blurred

3. What the reviewer checks

These are the checks the reviewer makes, in this order:

1 Find whether the report records a photograph attached.

2 Read each sentence of this kind for what the photograph shows.

3 Check that the photograph shows the defect type the report gives.

4 Note a photograph described in a document of a report that records none.

5 Note a photograph too dark or too far away to show the defect.

4. Requirements it bears on

Photograph bears on the photograph requirement of the carriageway, footway and drainage standards.

5. When the statement and the report disagree

When a statement describes a photograph that the report does not record, or one that shows another defect, the reviewer notes it for the Highways Inspector and keeps the report's answer, which still decides the requirement.

6. What to ask the reporter for

Ask the reporter for a clear photograph of the defect taken in daylight, with a ruler or a tape beside it.

7. Telling it apart

What a picture shows is a photograph, even when it says where the picture was taken from; saying where the defect is, is a location, which the Location guide covers. "The photo was taken from the corner of the street" is a photograph; "the hole is on the corner of the street" is a location.
