StreetCare AI — requests and responses, route by route

Shapes from the spec (api/schemas.py section); values from the real report rows. Model figures and LLM texts are not in the folder and are shown as “…”.

Built from the spec: config/config.py is not in this folder — <names> are config values

1 POST /auth/signin

200

as the Street Care Coordinator — request

```
{"username": "<coordinator>", "password": "…"}
```

response 200

```
{ "username": "<coordinator>", "display_name": "…",
"role": "Street Care Coordinator", "session_token": "…",
"pages": <ROLE_PAGE_ACCESS[Street Care Coordinator]>, … }
```

stored `UPDATE user_accounts SET session_token = '…'`

2 GET /queue/SC0052158

200

as the Street Care Coordinator — request

```
X-Session-Token: …
```

response 200

```
{ "report_reference": "SC0052158", "report_status": "<REPORT_STATUS_AWAITING_REVIEW>",
"report_profile": { "street_name": "Station Road", "district": "Town Centre",

"recommendation_text": "…", "recommended_decision": "ORDER REPAIR",
"status": "<REVIEW_STATUS_AWAITING>", "llm_call_count": 5,
"decision": null, "order_document_text": null,
"resident_update_text": null, "coordination_brief": null, … }
```

stored

```
INSERT agent_runs · INSERT llm_calls × 5 · INSERT report_reviews
checkpoint.db: state saved at await_inspector_decision
```

4 POST /chat/ask

1 LLM call

200

as a Customer Services Adviser — request

```
{"question": "What is happening with SC-52158?"}
```

response 200

```
{ "question_type": "REPORT STATUS", "report_reference": "SC0052158",
"answer": <CHAT_ADVISER_STATUS_TEMPLATE> — Footway, Station Road, and the
<REPORT_STATUS_PHRASES> phrase for awaiting a decision,
"source_documents": [], "was_refused": false }
// written by code (chat/record_answer.py), never by the model
```

stored `INSERT chat_turns (adviser, REPORT STATUS, SC0052158)`

5 POST /reviews/REV-<12 hex>/decision

403

as a North Highways Inspector — request

```
{"decision": "ORDER REPAIR", "decision_reason": "…"}
```

response 403

```
{"detail": <DISTRICT_REFUSED_MESSAGE> filled with username, district North,
street_name Station Road and report_reference SC0052158}
```

stored `nothing — refused before the review is looked at`

6 POST /reviews/REV-<12 hex>/decision

2 LLM calls

200

as the Town Centre Highways Inspector — request

```
{"decision": "ORDER REPAIR",
"decision_reason": "Every requirement of the footway standard is met and no
street works conflict, so the repair can be ordered."}
```

response 200

```
{ …same review…, "status": "<REVIEW_STATUS_REPAIR_ORDERED>", "llm_call_count": 7,
"decision": "ORDER REPAIR", "decided_by": "<inspector-tc-1>",
"decided_by_role": "Highways Inspector", "decided_by_district": "Town Centre",
"order_document_text": "SUBJECT … works order to the repair contractor …",
"document_details": { "report_reference": "SC0052158", "street": "Station Road",
"location": "outside no. 17", … },
"resident_update_text": "HEADLINE … UPDATE … <DOCUMENT_SIGN_OFF>",
"coordination_brief": null }
// no model figure in either text, no staff name in the resident update
```

stored

```
INSERT llm_calls × 2 · INSERT review_decisions · UPDATE report_reviews
UPDATE agent_runs → COMPLETE, 7 (one transaction)
```

7 POST /chat/ask

1 LLM call

200

as a Customer Services Adviser — request

```
{"question": "Is anything being done about SC-52158?"}
```

response 200

```
{ "question_type": "REPORT STATUS",
"answer": <CHAT_ADVISER_STATUS_TEMPLATE> (repair ordered) + " " +
<CHAT_ORDERED_REPAIR_TEMPLATE> — outside no. 17 and what the
resident has been told, … }
```

stored `INSERT chat_turns (adviser, REPORT STATUS)`

8 POST /chat/ask

1 LLM call

200

as a Customer Services Adviser — request

```
{"question": "Will that hole on Station Road come back?"}
```

response 200

```
{ "question_type": "OUTCOME PREDICTION",
"answer": <OUTCOME_NOT_PREDICTED_LINE>, … }
// an inspector or coordinator asking gets the review's record, figures included
```

stored `INSERT chat_turns (adviser, OUTCOME PREDICTION)`

9 GET /reviews/REV-<12 hex>/calls

200

as the Street Care Coordinator — request

```
X-Session-Token: …
```

response 200

```
{ "review_id": "REV-<12 hex>", "run_id": "RUN-<12 hex>",
"call_count": 7, "expected_call_count": <LLM_CALLS_BY_DECISION[ORDER REPAIR]>,
"total_tokens": Σ, "total_latency_milliseconds": Σ,
"calls": [ planner, requirements, evidence, risk, writer,
order_writer, update_writer ] }
```

stored `none — read-only`

10 POST /auth/signout

200

as the Street Care Coordinator — request

```
X-Session-Token: …
```

response 200

```
{"username": "<coordinator>", "signed_out": true}
// again, or any guarded call with it → 401 <SIGN_IN_REQUIRED_MESSAGE>
```

stored `UPDATE user_accounts SET session_token = NULL`
