StreetCare AI — what is stored, step by step

Each row is a store, each column a step of the story: INS insert · UPD update · RD read · WR checkpoint write. Empty = untouched.

Built from the spec: config/config.py is not in this folder — <names> are config values

	① coordinator signs in	② queue + detail	③ open review	④ adviser asks status	⑤ North refused	⑥ TC inspector orders	⑦ adviser asks ×2	⑧ audit calls	⑨ sign out
user_accounts *seeded staff + district*	UPD coordinator token = new	RD token → account	RD token → account	UPD adviser signs in	RD inspector-n-1: district North	UPD inspector-tc-1 signs in		RD token → account	UPD coordinator token = NULL
agent_runs *report_reference · coordinator_id*			INS RUN-<12 hex> RUNNING → AWAITING · 5			UPD COMPLETE 7 calls			
report_reviews *one per report revision*		RD status per row (none yet)	INS REV-<12 hex> <…AWAITING> ORDER REPAIR	RD status → phrase		UPD <…REPAIR_ORDERED> order + update document_details	RD ordered → where + what was told	RD review → run	
llm_calls *accepted replies only*			INS × 5 rows planner … writer			INS × 2 rows order + update writers		RD 7 rows summed	
review_decisions *one per review*						INS ORDER REPAIR inspector-tc-1 Town Centre			
chat_turns *every reply, refusals too*				INS REPORT STATUS + RD own turns			INS REPORT STATUS OUTCOME PREDICTION		
checkpoint.db *LangGraph checkpointer*			WR state saved at await_inspector_ decision			WR resume → order → update → record			
chroma_store *16 PDFs, casebook not*			RD standard §4 guide §3 checks	RD question search		RD standard §7 + §8	RD question search		

After step ⑨ — the rows this story leaves behind (shape from the spec; ids illustrative)

agent_runs

```
run_id  RUN-<12 hex>
report  SC0052158
coordinator_id <coordinator>
status  COMPLETE
llm_call_count 7
```

report_reviews

```
review_id REV-<12 hex>
assessment ORDER REPAIR
requirements 4 × Met
triggers   none
status <REVIEW_STATUS_REPAIR_ORDERED>
order + resident update written
```

review_decisions

```
decision ORDER REPAIR
decided_by <inspector-tc-1>
role Highways Inspector
district Town Centre
decision_reason Every requirement…
```

chat_turns (3)

```
adviser REPORT STATUS
adviser REPORT STATUS
adviser OUTCOME PREDICTION
```

INSPECT ON SITE would write the inspection request only (6 calls); REFER FOR COORDINATION writes the coordination brief in code (5 calls).
Nothing is stored for the North inspector's refused decision, and a request that fails records no chat turn.
