StreetCare AI — unhappy paths and refusals

StreetCare guards by permission (<PERMISSION_BY_ROUTE>) and then by district for a Highways Inspector; every refusal before 2xx costs no LLM call

Built from the spec: config/config.py is not in this folder — <names> are config values

The order every guarded request passes through

401 — **no token, or one no account holds**
<SIGN_IN_REQUIRED_MESSAGE>

403 — **role lacks the route's permission**
<ROLE_PERMISSIONS> · <PERMISSION_BY_ROUTE>

422 — **body / query fails the schema**
FastAPI's own validation body

404 — **report or review unknown**
<UNKNOWN_REPORT_MESSAGE> · <REVIEW_NOT_FOUND_MESSAGE>

403 — **inspector outside the report's district**
authorize_district → <DISTRICT_REFUSED_MESSAGE>

409 — **already reviewed / decided / refused**
find_review_conflict · find_decision_refusal

2xx — **endpoint runs — LLM calls only from here**
200, or 201 for POST /reviews

502 — **any failure, checkpoint missing**
report_failed_request; run → FAILED

0 LLM calls
0 rows written

How the dashboard shows it

dashboard/api_client.py

every request goes through dashboard/api_client.py with the token
401 → back to sign-in; any other ≥ 400 → the detail as an error
starting a review waits for 5 model calls (the spinner says so)

Every route — what can come back (from the api/routes.py section of StreetCare_AI.pdf)

POST /auth/signin — area: public

- 200 — SignedInUserResponse — fresh token replaces any earlier one
- 401 — <SIGN_IN_FAILED_MESSAGE> (same words for an unknown username)

POST /auth/signout — area: public

- 200 — SignedOutResponse, signed_out true
- 401 — <SIGN_IN_REQUIRED_MESSAGE> (no token, or one already ended)

GET /queue — area: permission

- 200 — [QueueRow] — All, or rows whose defect type or linked type matches
- 422 — defect_type missing or not in <QUEUE_DEFECT_TYPE_OPTIONS>
- 403 — Customer Services Adviser lacks the permission

GET /queue/{report_reference} — area: permission

- 200 — ReportDetailResponse
- 404 — <UNKNOWN_REPORT_MESSAGE> filled with the reference

POST /reviews — area: permission

- 201 — ReviewRecordResponse, the stored review at the gate, 5 LLM calls
- 404 — <UNKNOWN_REPORT_MESSAGE>
- 403 — <DISTRICT_REFUSED_MESSAGE> — an inspector outside the report's district
- 409 — <REPORT_ALREADY_REVIEWED_MESSAGE> with the revision and the reference
- 502 — a failure mid-run — the run is recorded FAILED with its calls so far

POST /reviews/{review_id}/decision — area: permission

- 200 — ORDER REPAIR (7 calls) · INSPECT ON SITE (6) · REFER FOR COORDINATION (5, brief by code)
- 404 — <REVIEW_NOT_FOUND_MESSAGE>
- 403 — <DISTRICT_REFUSED_MESSAGE>
- 409 — find_review_conflict first (already decided · decision in progress)
- 409 — then find_decision_refusal (own review · decision not open · …)
- 502 — <REVIEW_OUTSIDE_QUEUE_MESSAGE> · <CHECKPOINT_MISSING_MESSAGE>

GET /reviews?status_value=… — area: permission

- 200 — [ReviewRecordResponse] in report-reference order

GET /reviews/{review_id}/calls — area: permission

- 200 — ReviewCallsResponse — expected 5 before a decision, then 7 / 6 / 5
- 404 — <REVIEW_NOT_FOUND_MESSAGE>

POST /chat/ask — area: permission

- 200 — documents answer, with sources · REPORT STATUS / OUTCOME PREDICTION from records by role
- 200 — STREET FIGURE only from ≥ <GROUP_SIZE_MINIMUM> reports, else <GROUP_SIZE_LINE>
- 200 — <CHAT_NO_REPORT_TEMPLATE> · <CHAT_REFUSAL_MESSAGE>
- 422 — question too short or too long

GET /chat/turns · GET /audit/chat-turns — area: permission

- 200 — own turns · everyone's turns, newest first
- 422 — turn_limit outside 1 – <CHAT_AUDIT_MAX_ROWS>
